

When
I am hungry and searching
for a restaurant

I want
a quick recommendation

So I can
avoid scrolling through too
many options

When
I am hungry and searching
for a restaurant

I want
a quick recommendation

So I can
avoid scrolling through too
many options

When I search for food
I want results tailored to my
preferences
So I can quickly find
something I like

When I search for food
I want results tailored to my
preferences
So I can quickly find
something I like

When I have a specific need
I want to describe it naturally
So I can avoid using filters

When I have a specific need
I want to describe it naturally
So I can avoid using filters

When
I am choosing between
options

I want
to compare them
side-by-side

So I can
make a confident decision

When
I am choosing between
options

I want
to compare them
side-by-side

So I can
make a confident decision

When
I have limited time

I want
one clear
recommendation

So I can
decide immediately

When
I have limited time

I want
one clear
recommendation

So I can
decide immediately
