

Project Timeline Presentation

Project Description

Our project is an AI-assisted restaurant based e-commerce site that allows users to search for and look at restaurants and desired foods in a search bar. We intend to include an AI assistant that can help recommend restaurants that are cheapest and nearest to the user.

Team Contribution

Full Name: **Thang
Nguyen**

Contribution: Research
and problem statement

Full Name: **Ryan
Chang**

Contribution: Frontend
development

Full Name: **Sree
Mourya Gojja**

Contribution: Frontend
development, Backend
design and database

Current State

	Duration	Start	End	Week 1	Week 2	Week 3	Week 4
Research & Problem Definition	14 Days	03/27	04/10				
Evaluate Yelp using heuristics	7 Days	03/27	04/03				
Identify flaws in Yelp's user interface	7 Days	03/27	04/10				
Perform thematic analysis on Yelp Reviews	7 Days	04/03	04/10				
Conceptual Design	24 Days	04/03	04/27				
Define conceptual model	3 Days	04/03	04/6				
Create job stories	7 Days	04/03	04/10				
Build storyboard, sketch initial wireframes, develop prototype, etc.	17 Days	04/10	04/27

2026/04/26-27

Research & Problem Definition

Evaluate Yelp using heuristics, identify gaps in progress tracking, review related tools, and define the problem and user needs.

Conceptual Design

Define conceptual model, create job story, build storyboard, and sketch initial wireframes.

UI Prototype

Develop UI flows for main screens and define navigation between them. Construct a functional, interactable, small-scale prototype of the final product.

Refinement & Presentation Preparation

Refine UI flows for clarity and usability, finalize interaction flow and prototype, and prepare slides for the presentation.

Challenges

01

Coordinating meeting times and collaboration was difficult due to different schedules among team members.

02

Preparation for midterm examinations and other commitments further reduced the amount of time members had to work on the project.

03

Displaying too many results at once can potentially overwhelm users and reduce usability.
